BF40E

This is a selection of BF40E standard conveyor sizes. Given speeds are based on using an MS63B-4 with the appropriate SB030 gear.

Recommended max. load 75 kg. The recommended max load is evenly spread over the entire conveyor and is in relation to a nominal width and length.

Dimensions in mm.

For other dimensions please contact Rollco.

Tracking Guides

This profile is used as a tracking guide. It is longitudinally applied on the running side of a belt, mainly in applications where transversal forces occur.

Highly flexible V-shaped notched PVC-profile running over pulleys with a specifically shaped groove.

Profiles are applied to the belt using hot air welding or glue.
