PSW 32 - Shaft 14 mm hollow

- Positioning system with IP 68
- · Absolute measuring system, without battery

· Galvanically separated supply voltages between control and motor and bus

· Absolute encoder eliminates the need for reference runs during system setup and installation of replacements

· Easy address assignment directly on the device using integrated address switches (not for IO-Link)

 Manual disconnecting lever permits manual disconnection of the gearbox

· Regulation of the current torque prevents overloading and unnecessary run aborts

· Strong breakaway torque enables safe start-up even after an extended standstill

· Intelligent running behaviour. Recognises the difference between obstacles and dirt

· Spindle offset run: Excludes inconsistencies due to lash in the spindle

· Condition monitoring of supply voltage, drag error (permits optimum adjustment of current position), power consumption and torque

· Partial safety function for STO (Safe Torque Off)
