Steel Angle

Links two aluminium profiles at a right angle.

Note: To install the ESD-ready angles, use a notched slot nut in order to make a conductive link.

Mounting material On-site construction: Angle 20: M5 × 8 countersunk screw (DIN7991), M5 slot 5 slot nut

Angle 30: M6 × 10 countersunk screw (DIN7991), M6 slot 6 slot nut

System: 30 - Slot 6; 20 - Slot 5 **Type:** Angles Brackets and Corners; Fasteners

Automatic Connectors

The set of automatic connectors mount quickly and easily because there is no need for modifying the profiles. Universal force-fit link for all profiles from the same series plus the option of moving them afterwards because the connectors are fitted in a single profile only. There is no restriction on installing them in existing constructions later.

Note: We recommend that you install them in pairs - this is also what the stress data refers to.

Automatic Butt Connector

Use the automatic butt connector to quickly and easily link the face ends of two profiles from the same series without having to machine the profiles beforehand. Best practice is to use the automatic butt connectors in pairs. You may need several pairs, depending on the size and load on the profiles. Package includes the screw and cutting bush. Note: The load values refer to connectors installed in pairs
